Problem Solved!

Spring Term 2022

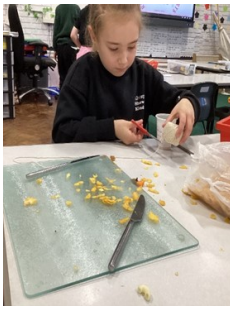
Dear families,

Here at Oxbridge Lane, our DT curriculum aims to inspire creativity and imagination to design and make products. Throughout the year, all children will think about nutrition and take part in a cooking activity. Children will also get the opportunity to take part in educational visits or welcome visitors to school to enhance their learning. We aim to have lots of fun.

During the **Spring Term,** Nursery children made marble runs and self-portraits as well as a ramp for cars and a train.

At the end of the **Spring Term,** the whole school designed and decorated eggs for the Easter competition.

Year 2 made bird feeders during the **Spring Term.** The children learned to use the bridge and claw methods to cut the fruit and vegetables. They also learned that lard holds the food in the bird feeder together.



Y4 children made dream catchers out of recycled materials, in the **Spring Term**.

Other DT activities that took place during the **Spring Term** include making Easter cards in Year 1, making bridges in Year 5 and upcycling, using old materials to make something new, in Year 6.
